SG-16N/16D Structural Drawing of Staggered Blades

■ Features

- SG-16N/16D series adopts staggered blades and unfixed blades to diffuse impact load, improve cutting efficiency. The blade rest design without adjustment makes blade replacement more convenient.
- Low granulating speed and sharp angle design of rotating blades are helpful for smooth and continuous operation.
- SG-20N series is equipped with presetting knife jig, simple cutter installation adjusting technology makes the rotating blades and fixed blades be adjusted within clamps outside machine, no longer needs to be adjusted from inside of machine as before.
- Gear motor of SG-1628D series directly drives the blades to rotate for granulating, which saves regulation and maintenance time of belt driving and tension .
- The material collector is located outside the cutting chamber to avoid leakage.
- Optimal cutting angle makes resistance small and avoid blockage to improve cutting efficiency.
- Optimal design can effectively reduce vibration during operation of granulator.
- Low speed granulating ensures well-proportioned granules and low dust level .
- Low speed and sound-proof material hopper brings a quiet operation environment.
- Easy access to easy maintenance and cleaning.
- Small in size with castors for easy moving.
- High safety grade design to comply with industrial safety standard.
- With optional magnet installed at the inlet of the feeding chamber, metal impurities in the materials can be avoided.

SG-16N/16D Staggered Blades

Presetting Knife Jig

SG-20N Paddle Blades

Application

SG-16N/16D/20N series low-speed granulators are suitable for crushing sprues material and a few rejects. It is set on the side of injection moulding machine and picker, collocating with belt conveyor. It features low speed, big driving torque, low noise, little dust level and simple operation.

- 1.Hopper loader
- 2.Dryer
- 3.Vacuum hopper
- 4.Vacuum pipe
- 5.Proportional valve
- 6.Material pipe
- 7.Phtosensor hopper
- 8.Material storage tank
- 9.Low-speed granulator

SG-16N/16D/20N Series

Application 3

Options

30-Sec Instant Recycling System (Patented product)

VR Type 30-Sec Instant Recycling
 (Especially suitable for white and transparent material)

BR Type 30-Sec Instant Recycling

SG-16N/16D/20N Series

Full-receiver Alarm Device

Full-receive alarm device can help to realize unmanned operation and no materials will be wasted. Whenever the regrind level reaches the motor position, the machine will be forced to stop and be cut off via it is sensor, thus stop the granulator and warn the user by sounding an alarm. Applicable to SG-16N/16D/20N series.

Level Motor

Regrind Conveying Via Blower & Cyclone (BC Type)

This device utilizes loading blower to convey regrind into the cyclone dust collector to separate the regrind from the air and then the regrind will fall into storage hopper or cloth bag. Applicable to SG-16N/16D/20N series.

Dust Separators (DS Type)

Dust Separator (DS type) can separate the dust in the regrind for immediate recycle use. The dust will be kept in filter bag, thus working environment will be maintained clean. This device ensures full use of regrind to avoid material wasting and enhance the economy returns. Applicable to SG-16N/16D/20N series.

Straight Hopper

Straight hopper has been designed to meet the demand of grinding pipes and runners. Applicable to SG-20N blades series(exclusive of SG-2028NH).

Special Screen

Special screen mesh sizes includes $\Phi 4$, $\Phi 6$, $\Phi 8$, $\Phi 10$, $\Phi 12$ (mm), which are applicable to SG-16N/16D series; and $\Phi 4$, $\Phi 5$, $\Phi 7$, $\Phi 8$, $\Phi 10$, $\Phi 12$ (mm), which are applicable to SG-20N series. All can be selected to meet customer's requirement.

Double-layer Screen

Double-layer screen is designed for customers with long and thin materials.

Optionally Equipped with Coiled Spring Conveyor

Applicable to SG-16N/20N series.

Height-increasing storage bin

Height-increasing storage tank helps to collect and store regrind. Applicable to SG-16N/20N series.

- For granulating fibre-added material, it increases fibre-added granulator model for choose. Adopt surface-hardening treatment on the material contacting components. SG-20N fibre-added model chooses V-4E blade material. Add "F" at the model behind.
- Optional higher motor power add "H" at the end of the model code.
- For stainless steel made feed port and storage box, add "R" at the end of the model code.

- Notes: 1) "√" stands for standard, "○" stands for options, "-" stands for none.
2) Max. capacity of the machine is subject to diameter of screen hole and composition of the material. The listed maximum output is tested continually with PET preforms.
3) Noise level varies with materials and motor types.
4) To avoid plastic from sticking to the blades, all materials should be crushed at normal temperature.
5) "H" stands for motor power, "C" stands for staggered blade.
6) Power supply: 3Φ, 400/460/575VAC, 50/60Hz.

We reserve the right to change specifications without prior notice.
